

Electrical Transformers Symbols [[Go to Website](https://www.electrical-symbols.com)]

 <p>Transformer Two windings and an air core Generic symbol</p>	 <p>Transformer Two windings and an air core</p>	 <p>Transformer Two windings and an air core</p>	 <p>Transformer Two windings and an air core</p>
 <p>Transformer core Fe-Si Laminated core</p>	 <p>Transformer with saturable reactor</p>	 <p>Ferrite core transformer</p>	 <p>Variable coupling transformer</p>
 <p>Shielded transformer</p>	 <p>Variable coupling transformer</p>	 <p>Single-phase transformer with continuous current regulation</p>	 <p>Variable coupling transformer</p>
 <p>Voltage transformer Transformer with voltage regulation</p>	 <p>Transformer with moving magnet</p>	 <p>Adjustable transformer core</p>	 <p>Adjustable transformer core</p>
 <p>Current transformer Pulse transformer</p>	 <p>Current transformer with two cores with a secondary winding on each core</p>	 <p>Current transformer with dual core</p>	 <p>Current transformer with three primary conductors</p>

Electrical Transformers Symbols [[Go to Website](#)]

 <p>Current transformer with a secondary winding with a power</p>	 <p>Current transformer with two secondary windings on a single core and three primary</p>	 <p>Current transformer with two secondary windings on a core</p>	 <p>Low-pass transformer</p>
 <p>High-pass transformer</p>	 <p>Single-phase transformer with a shunt winding</p>	 <p>Indicates the polarity of the windings</p>	 <p>Transformer with three windings</p>

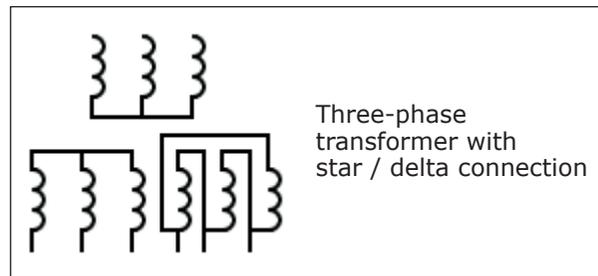

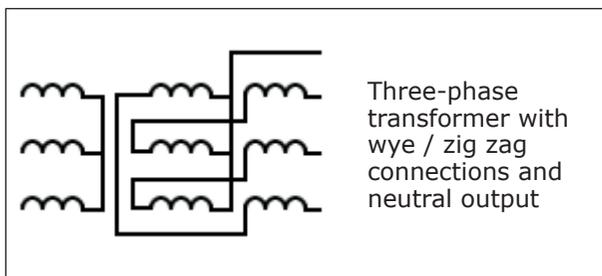

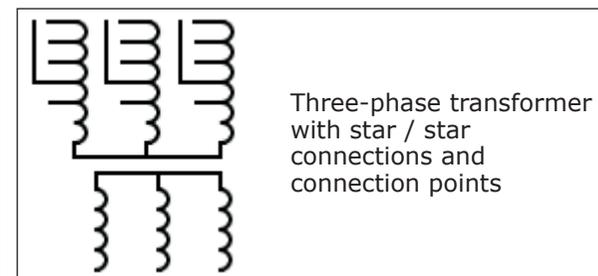

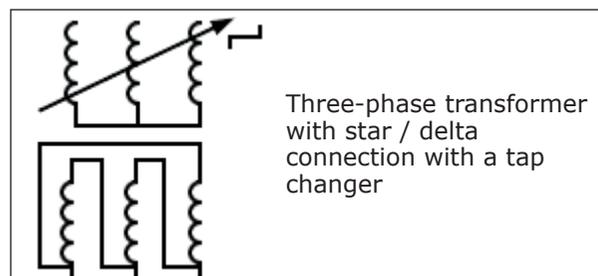

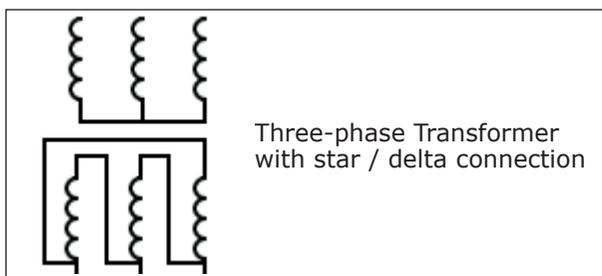

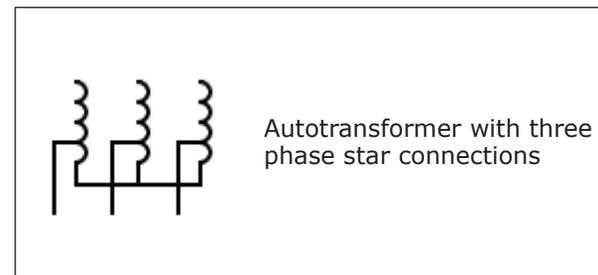

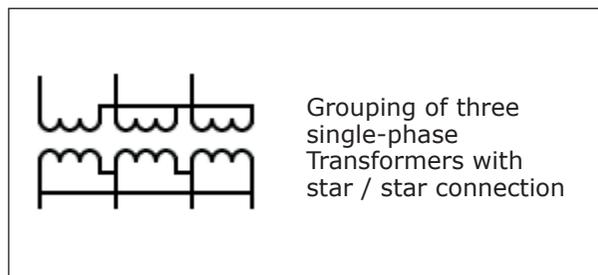

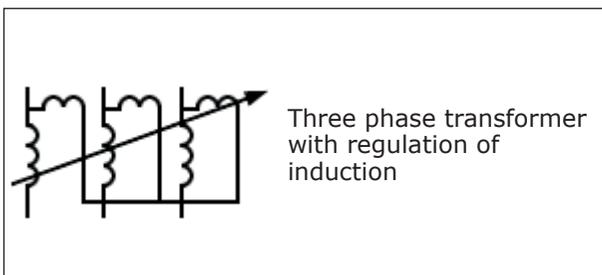

All Electrical & Electronic Symbols in <https://www.electrical-symbols.com>

Autotransformers Symbols [[Go to Website](#)]

 <p>Autotransformers</p>	 <p>Autotransformers</p>	 <p>Variable autotransformer Single phase autotransformer with adjustable voltage</p>	 <p>Autotransformers</p>
 <p>Variable autotransformer Single phase autotransformer with adjustable voltage</p>	 <p>Autotransformer with iron core</p>
